

Type of run	Definition	On-prem Automation ¹	Cloud Automation ¹
Scheduled run (except as part of a Plan)	Automated workflow run on a schedule (e.g. nightly etc)	√	√
API triggered run (except as part of a Plan)	Workflow run triggered by an API	√	√
Scheduled Plan runs ²	Plan runs on schedule	NA	√
API triggered Plan runs ²	Plan runs triggered via API	NA	√
Manual run on Server / Cloud Execution by a viewer user	Run on Server / Cloud Execution triggered via an ad-hoc-run button	√	√
Analytic app run by a viewer ^{3,4}	Apps run by viewer users	√	√ ³
Test runs in Sandbox environment		√	√
Auto Insights scheduled data refresh ⁴			√
Auto Insights scheduled email sends ⁴			√
Automated workflow runs resulting in errors	Any workflow run that results in an error, whether user driven or due to Alteryx technical error	X	X
Validation runs	Metadata runs triggered via Designer Desktop when uploading to Server	X	X
Design time runs in Designer Cloud and Designer	Manual run in Designer Cloud / Designer / Plan by hitting "Run" button	X	X

1. On-prem Automation includes Server capabilities: Cloud Automation includes Cloud Execution for Desktop and Cloud Platform capabilities.
2. Plan runs will count as 1 run regardless of the number of workflows/assets executed as part of Plan.
3. App Builder loads will be counted towards automation credits.
4. App Builder and Auto Insights functionality and tracking expected in early 3QFY25.
